

Luxinations Website Documentation

1. Introduction

Luxinations is an online gaming equipment website developed to provide gamers with high-quality gaming accessories such as keyboards, gaming mice, headsets, controllers, gaming chairs and other accessories. The website allows customers to browse products, view prices, and place orders online through a simple and responsive interface.

The website was developed using HTML5 and CSS3 while following the website development process required in the assignment. The website is designed to work on both desktop and mobile devices.

2. Website Specifications

Website Objective

The objective of Luxinations is to create an online platform where gamers can easily access and purchase gaming equipment.

The website aims to:

Promote gaming products online

Increase accessibility of gaming equipment

Provide a modern shopping experience

Allow customers to place orders online

Improve business visibility through online presence

Goals of the Website

The goals of Luxinations include:

Providing users with information about gaming products

Offering affordable gaming equipment

Improving customer interaction through feedback forms

Creating a responsive website that works on mobile devices

Building a professional online gaming brand

Target Audience

The primary target audience includes:

Gamers

Students

Content creators

Technology enthusiasts

Demographics

Age Group: 15 – 35 years

Gender: Male and Female

Location: Botswana and surrounding regions

Interests: Gaming, streaming, esports and technology

Technical Aptitude

The users are expected to have:

Basic internet browsing skills

Ability to navigate online shopping websites

Knowledge of using smartphones and computers

Type of Website

Luxinations is an:

E-commerce Website

Gaming Equipment Store

Product Showcase Website

The website contains:

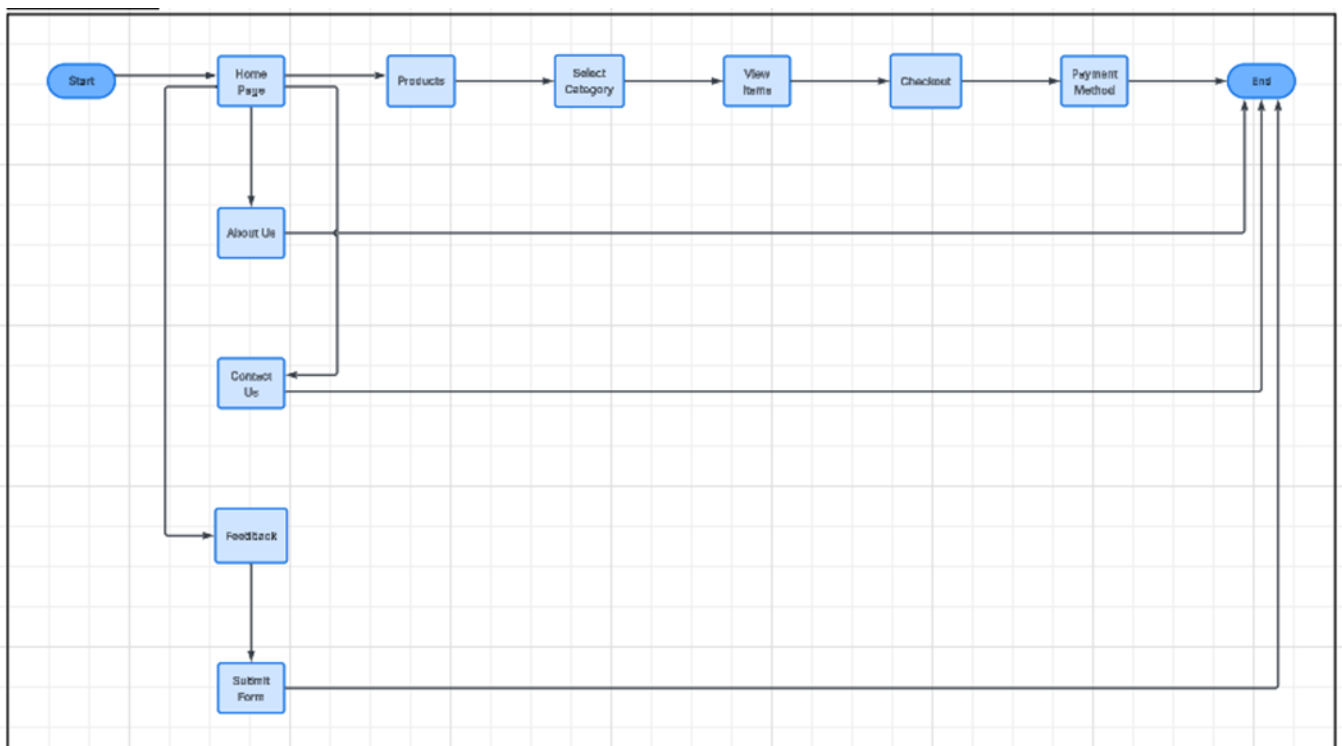

Product pages

Shopping/checkout page

Feedback forms

Company information pages

3. Information Design & Taxonomy

Navigation Structure

The website uses a consistent navigation menu across all pages.

Navigation links:

Home

Products

Checkout

About

Feedback

This structure ensures easy access to all pages while maintaining the 3-click rule.

4. Page Template Design

The website uses a dark gaming-themed interface with purple accents to match the gaming industry aesthetic.

Main Design Features

Dark background colors

Responsive page layout

Product cards

Hero banners

Navigation bars

Footer sections

Product grids

Responsive forms

Wireframe Pages Included

Home Page

Products Page

Checkout Page

About Page

Feedback Page

The wireframes were used to visually plan the website layout before development.

5. Technical Brief

Technologies Used

HTML5

Used for:

Creating webpage structure

Forms

Navigation

Product sections

CSS3

Used for:

Styling webpages

Responsive layouts

Colors and spacing

Mobile responsiveness

Visual Studio Code

Used as the main code editor for developing the website.

GitHub Pages

Used for hosting and publishing the website online.

Browser Tools

Used for:

Testing responsiveness

Debugging

Mobile device simulations

Hardware Requirements

The website can run on:

Desktop computers

Laptops

Tablets

Smartphones

6. Quality Assurance Testing

The website was tested to ensure:

All links are functional

Pages display correctly

Forms validate correctly

Mobile responsiveness works properly

Browser Compatibility Testing

The website was tested on:

Google Chrome

Microsoft Edge

Mozilla Firefox

Mobile Device Testing

The website was tested using:

Chrome Developer Tools

Android screen simulation

Tablet screen simulation

Test Results

Test Area	Result
-----------	--------

Navigation Links	Passed
------------------	--------

Mobile Responsiveness	Passed
-----------------------	--------

Form Validation	Passed
-----------------	--------

Layout Consistency	Passed
--------------------	--------

Page Loading	Passed
--------------	--------

7. Publishing & Promotion

The website is hosted using GitHub Pages.

Hosting Tools Used

GitHub

GitHub Pages

Git commands

GitHub Commands Used

`git init`

`git add .`

`git commit -m "Initial commit"`

`git branch -M main`

`git remote add origin [repository link]`

`git push -u origin main`

Website Link

<https://cse25-246.github.io/luxinations/>

8. Future Developments & Recommendations

Future improvements may include:

Shopping cart functionality

Online payment integration

User login system

Product search functionality

Product filtering and sorting

JavaScript animations

Database integration

Real-time order tracking

9. Conclusion

Luxinations successfully demonstrates the planning, design and development of a responsive gaming equipment website using HTML5 and CSS3. The website satisfies the assignment requirements by providing multiple interconnected pages, responsive layouts, forms and consistent navigation.

The project also demonstrates the importance of website planning, wireframing, testing and publishing in the web development process.
